
JavaScript and HTML DOM 💻🌐
Introduction to DOM
What is DOM?
Tree Structure
Nodes, Elements, Text
JavaScript & DOM Interaction
Real-World Example
Dynamic Updates in Web Apps (Instagram, Facebook, Twitter)
DOM Manipulation
Content & Attributes
innerHTML, innerText, textContent
setAttribute(), getAttribute()
Modifying CSS
Using .style
classList Methods
Creating & Removing Elements
createElement(), appendChild()
removeChild(), element.remove()
Mini Practical Task
Real-World Example
'Read More/Read Less' Toggle
Event Handling
Events & Listeners
What are Events?
addEventListener()
Common Event Types
Preventing Default Behavior
preventDefault()
stopPropagation()
Event Delegation
Mini Practical Task
Real-World Example
Dynamic Dropdown Menu
DOM Selection
Methods
getElementById()
getElementsByClassName()
getElementsByTagName()
querySelector()
querySelectorAll()
Best Practices
Mini Practical Task
Real-World Example
Dynamic Form Validation
DOM Traversal
Navigation
Parent, Child, Sibling
parentNode, parentElement
childNodes, children
firstChild, lastChild, firstElementChild, lastElementChild
nextSibling, previousSibling
Efficient Traversal
Mini Practical Task
Real-World Example
Breadcrumb Navigation
