
Vue.js 📖💻
Vue.js Basics
1: Setting up Vue.js
What is Vue.js?
Installing Vue.js (CDN vs Vue CLI)
Understanding Vue Instance
2: Vue Directives
v-bind: Dynamic Attributes
v-model: Two-way Data Binding
v-if, v-else, v-show
v-for: Looping
3: Vue Components
Creating Reusable Components
Parent-Child Communication (Props, Events, Emits)
Lab 3: Building a Simple Vue.js App
API Integration with Vue & State Management
1: Connecting Vue with RESTful APIs
Using Axios to fetch data (GET)
Displaying data dynamically
2: Handling API Requests & Error States
Sending POST, PUT, DELETE requests
Managing loading states, error messages, retries
3: State Management for API Data
reactive(), computed(), and watch()
Caching API responses
Lab 5: Integrating Vue with a Mock API (JSON Server)
Vue Router & Form Handling (SPA)
1: Vue Router - Single Page Applications (SPA)
What is Vue Router?
Setting up Vue Router (router-view, router-link)
Creating Multiple Views/Pages
2: Handling Forms & Validation
Using v-model
Form Validation
Route Parameters
3: Passing Data Between Pages & Navigation Guards
Passing Data
Navigation Guards
Lab 4: Implementing Vue Router
