Web Technology
Activity Week 01
install (i) Live Server, (ii) Rest Client, (iii) Test making API Requests (iv) jQuery

Activity 1.

Install Live Server in VS Code

- Open VS Code.
- Press `Ctrl+Shift+X` to open Extensions.
- Search for **Live Server** and click **Install**.
- Click **Reload** to activate.

Create & Test an HTML Page

- Create a file `hello.html`.
- Paste the following code:
-

JavaScript

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width,
initial-scale=1.0">
    <title>My First Web Page</title>
</head>
<body>
    <h1>Hello, World!</h1>
    <p>This is a simple HTML page.</p>
</body>
</html>
```

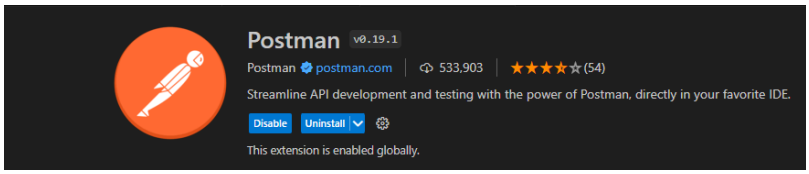

- Right-click the file and select **"Open with Live Server"**.
- The browser will display the page, auto-refreshing on changes

.

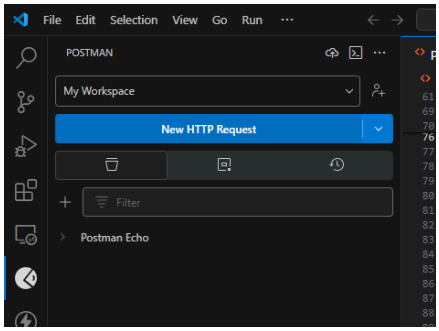

Activity 2:

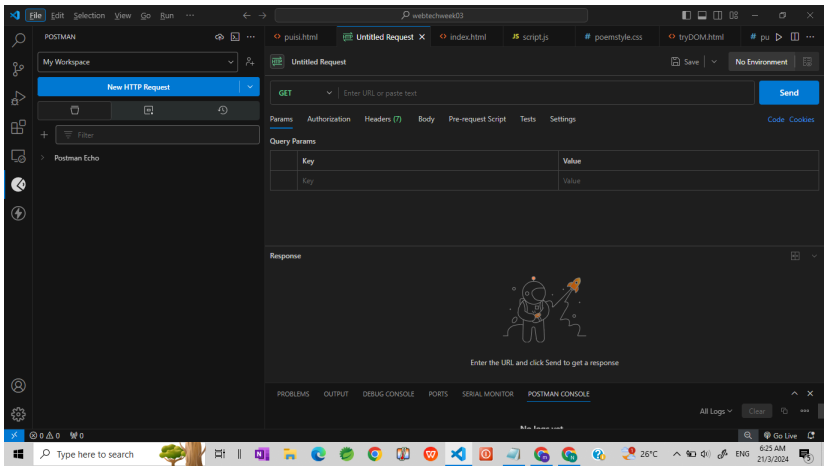

Install REST API Clients

Option 1: Install Postman Extension (Beta)

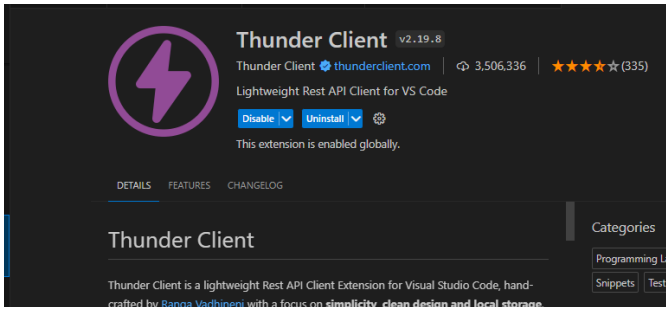

- Open VS Code and go to Extensions (`Ctrl+Shift+X`).
- Search Postman, click Install, and Reload if prompted.
- Access it from the sidebar or `Ctrl+Shift+P` → Type "Postman".

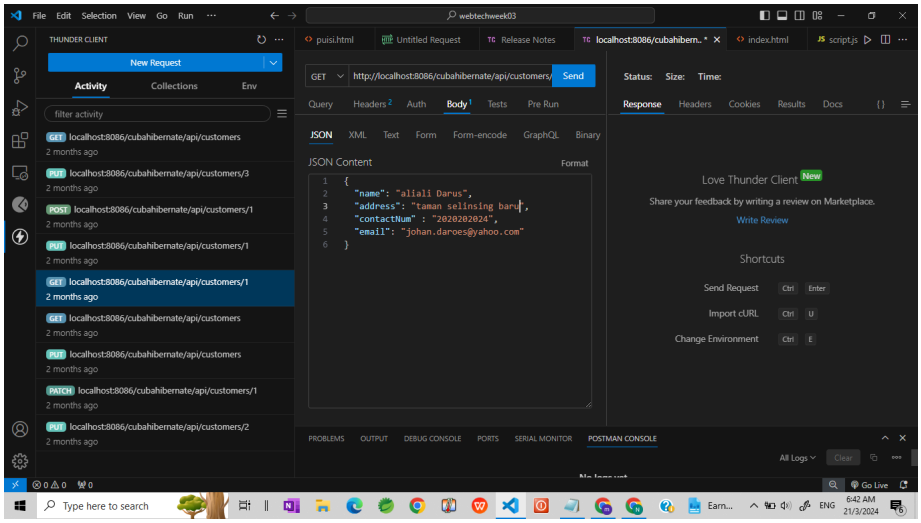

Option 2: Install Thunder Client Extension

- Follow the same steps as Postman, but search for Thunder Client instead.

Activity 3:

API Requests Using REST Client

- Use Postman/Thunder Client to perform API requests on `https://jsonplaceholder.typicode.com`.
- Test the following requests for `users` and `posts`:

Request	Body (if any)	Response
GET (all)	`{}`	Status, Data
GET (id)	N/A	Status, Data
POST	JSON	Status, Data
PUT (id)	JSON	Status, Data
PATCH (id)	JSON	Status, Data
DELETE (id)	N/A	Status

- **Submit:** Upload results to eLearning (Activity Week 1) as pdf file
- Use this table format (Copy/paste)

request	**Request body (json - if any)**	**response**
get(all)	**Body: {}**	**Status: body:{}**
get/id		
post		
put/id		
patch/id		
delete/id		

Activity 4.
Install jQuery

- Open VS Code, go to Extensions (`Ctrl+Shift+X`).
- Search **jQuery**, click **Install**, and **Reload** if prompted.
- Add jQuery to your project using a CDN:

```
JavaScript
<script
src="https://code.jquery.com/jquery-3.6.0.min.js"></script>
```

- Create `script.js` and add:

```
JavaScript
$(document).ready(function(){
    $("h1").click(function(){
        $(this).css("color", "red");
    });
});
```

- Link it in `hello.html` before `</body>`:

```
<script src="script.js"></script>
```
